BALLISTICS REPORT

.308 WIN – 176GR. PREDATOR

| REPORT DATE | REPORT NAME | PREPARED BY |
|----------------|--------------------------|----------------|
| March 16, 2018 | .308 WIN 176gr. Predator | ARM Technician |

Specifications:

Cartridge: Go West Trading Match Grade
Projectile: 176 Grain, CNC Lathed All Brass (ARM)
Primer: CCI 200 (Large Rifle)
Velocity: 2730
Energy: 2913 ft.\lbs.
BC: .590

Test Weapon: Nemo XO

Load Data:

Powder: IMR4064
Powder Load: 42gr.
Projectile: Predator
COL: 2.80

COMMENTS

We are excited to introduce a new line of LONG-DISTANCE SHOOTING ammunition. This new ammunition has unparalleled technology with the projectile and case. The bullet features a monolithic lathe turned projectile that is produced from proprietary brass alloy and has a patented parasitic drag elimination design on the tail of bullet, which eliminates dynamic transition instability during transonic flight speeds. This allows the bullet to get through transonic speed and into subsonic speed without destabilization, allowing for 1 MILE plus shots.
