BALLISTICS REPORT

6.5 CREEDMOOR– 121GR. PREDATOR

REPORT DATE	REPORT NAME	PREPARED BY
March 16, 2018	6.5 Creedmoor 121gr. Predator	ARM Technician

Specifications:

Cartridge: Go West Trading Match Grade
Projectile: 121 Grain, CNC Lathed All Brass (ARM)
Primer: CCI 200 (Large Rifle)
Velocity: 2900
Energy: 2260 ft.\lbs.
BC: .620

Test Weapon:

Load Data:

Powder: IMR 4350
Powder Load: 42gr.
Projectile: Predator
COL: 2.710

COMMENTS

We are excited to introduce a new line of LONG-DISTANCE SHOOTING ammunition. This new ammunition has unparalleled technology with the projectile and case. The bullet features a monolithic lathe turned projectile that is produced from proprietary brass alloy and has a patented parasitic drag elimination design on the tail of bullet, which eliminates dynamic transition instability during transonic flight speeds. This allows the bullet to get through transonic speed and into subsonic speed without destabilization, allowing for 1 MILE plus shots.
